

DON'T REGULATE VOIP! With the highest cost for IP bandwidth in places that NO TELCO will ever serve properly, I find it appalling to hear that the exact same TELCO states it's claim that WE the pioneers of RURAL BROADBAND, the few true techies working for the PEOPLE, to bring TECHNOLOGY to the grass root AMERICANS of our rural landscape are causing them the "TELCO" to lose money. Now; that they the "TELCO" can see, the real need for wireless communications. Bah! Leave the WISP alone; give the people the tools they need to compete with the metropolis of our country. DON'T REGULATE VOIP! Tax it, and you will drive the cost even higher for rural bandwidth. The one's to suffer will once again be left behind, and we may very well lose our greatest asset to this country. The farmers, and Ranchers of America.
